Feel The Chemistry – International Event at the Grupa Azoty Group

On November 13th 2014, the Grupa Azoty Group held the largest-ever meeting with its trading partners from all of its business segments, including in particular international partners. The meeting took place in Serock near Warsaw.

“This is an unprecedented event, both in terms of scale and formula. It brings a new quality in our communication with trading partners from around the world, and it presents a great opportunity to speak about achievements and plans and to get to know each other better,” comments Paweł Jarczewski, President of the Management Board.

The guests represented all major business segments of the Grupa Azoty Group, including logistics and procurement. The formula of the Feel The Chemistry event consists in a biannual meeting with our international partners, presentation of the Group's achievements and further development plans and ideas, and emphasis on the value of our community. This formula has been highly appreciated, as evidenced by the many thanks and acknowledgements received after the meeting. By getting to know the Grupa Azoty Group together, we also want to build better and safer future with our partners.
